

Cancer Research

THERAPEUTIC & RESEARCH TARGETS

With cancer now accounting for more than a third of all pharma assets in development, we can consider ourselves fortunate to be living in new age of targeted therapy.

TRC is proud to play its part in the fight against cancer by offering more than 8,000 products to support your research interests. All TRC products are delivered with a complete analytical data package, including full spectroscopic analysis and COAs, as well as specified chemical purity by NMR, HPLC, MS and elemental analysis.

- 4500+ ready to ship and highly cited research chemicals
- Unique product range of modulators & stable isotope labelled products
- Dedicated scientific team for custom orders
